

Danyell S. Noe

Mission My mission is to live life to the fullest, enjoying that which provides me income as much as is feasibly possible. Additionally, I strive to surround myself with positive and powerful people.

I am attracted to employers with a modern approach to a life/work balance and to projects that utilize innovative technologies to creatively and efficiently solve challenges.

Experience 2015 – 2016 Absolute Performance Inc. Full-Time Remote

Senior Software Engineer

API took over management of software development and IT support for SharpShooter Imaging (SSI). I was hired by API to facilitate in the migration of SSI's software development and support to the management of API. I worked remotely the entire time I was with this company.

- Completed development of custom payroll software which I architected and began development on while working for SSI. This software is used to calculate and manage all ski area employees' base pay and commission pay
- Provided training and support for SSI ski area managers and payroll staff in utilizing the new software to generate payrolls for 8 ski venues

2013 – 2015 SharpShooter Imaging Wheat Ridge, CO / Remote

Software Developer

- Primarily created new back end administrative tools while supporting & enhancing existing code
- Built a new payroll platform which provides commission calculations, data analysis / insight into hundreds of photographer's sales for 13 ski venues and report generation for use with ADP
- Created an affiliate/partner portal for use by MLB for baseball game photography

2011 – 2013 Broadnet Highlands Ranch, CO

Senior Software Engineer

- Developed and supported patented, proprietary software supporting auto-dialing and mass teleconferencing services on an infrastructure that serves millions of calls daily
- Senior developer focusing on new development, providing administrative tools and interfaces, custom web services, software/server maintenance scripts and other technologies as necessary
- Specialization in back-end tools for administration of call events by call support personnel, management of partner/client records and management / configuration of multiple servers running the application in various customized implementations
- Handle all aspects of development including requirements identification, object/database design and implementation, user interface design and build out and support of software after release

2008 – 2010 Reed Business Information Highlands Ranch, CO

PHP Developer IV

- Worked on a team of developers to support and enhance a proprietary CMS called NWP
- Aided in the migration efforts of approximately 26 sites from old platform to NWP
- Developed new functionality including requirements gathering, writing approaches, end-user documentation, user training and writing test cases for QA assessment
- Closed hundreds of support tickets
- Co-managed the process of migrating RBI's largest publication, Variety.com, from eLogic to NWP, including needs assessment, creating development project maps and timelines for migrations
- In a development team with a high rate of turnover and many contractors, my team leader and I were the longest tenured employees of any developers until layoffs forced our departure

Danyell S. Noe

2007 – 2008 HandleBiz Web Solutions Littleton, CO

Sole Proprietor

- Contractor for PHP software development (Weaver Multimedia, 5280 Innovations, etc.)
- Freelance development of dynamic websites in HTML, PHP / MySQL, AJAX / JavaScript
- Managed hosting of many clients, offering updates through a proprietary CMS I built

2005 – 2007 Digital Assets Inc. Littleton, CO

Web Application Developer

- I was one of only two developers on staff, and we handled all aspects of website development from Photoshop document depicting design to XHTML/CSS implementation to PHP/MySQL development of back-end administrative tools for dozens of websites

2003 – 2004 Ski Country Resorts & Sports Breckenridge, CO

IT Manager

- Handled all aspects of computer maintenance including hardware & software installation and upgrades, web development and user support
- Collaborated with previous designers to enhance website usability and functionality
- Shot digital photographs and edited for web and print publishing

2000 – 2003 Colorado State University Fort Collins, CO

IT Technician / Web Developer for Colorado Environmental Pesticide Education Program (CEPEP) at Colorado State University

- Handled all aspects of computer maintenance including hardware & software installation and upgrades, web development and user support
- Completed remodel of CEPEP website, updating and maintaining 300+ web pages
- Created and maintained a website for Rocky Mountain Agri-Business Association

Education 2000 – 2003 Colorado State University Fort Collins, CO

B.S. in Computer Science

Graduated May 2003, CSU Computer Science Club & Association for Computer Machinery

Technical Skills

Languages: PHP5 (OO), MySQL, HTML5, CSS3, JavaScript/jQuery, Blade, XML, etc.
Operating Systems: UNIX/Linux, All Windows versions, DOS – I don't do Mac
Software: PHPStorm, Vagrant, Composer, Gulp, Git/SVN, FTP/SSH clients, Photoshop, etc.

Expertise

- * Specialize in creating custom back end administrative tools in web-based CMSs
- * Skilled in data analytics & presenting complex information in easily-consumable interfaces
- * Employ object-oriented programming practices and cringe at the sight of procedural code
- * Prefer MVC and have a good working knowledge of this architectural pattern
- * Fully comfortable extending PHP frameworks and currently prefer Laravel
- * Can build RESTful APIs as well as write code to interact with 3rd party APIs
- * Proficient in front-end development w/expertise in HTML5, CSS3, jQuery/JS, Bootstrap
- * My workflow employs local VMs, Git, JIRA, Stash, Vagrant, Gulp, etc.
- * Big advocate of utilizing standards (PSR) and process re-engineering
- * Documentation is critical – of code, requirements, clearly-scoped deliverables & deadlines
- * Quite comfortable from the command line in Unix-y environments
- * Managerial & team skills including working with non-technical personnel
- * Experience with the hiring process and training new employees
