RECENT EXPERIENCE

Self-Employed, Remote — *Freelance Engineer*

March 2016 - PRESENT

Worked for a variety of clients in the SF Bay Area and Colorado performing primarily Laravel and WordPress development. My most notable client is [JamBase](#), with whom I have worked with extensively, creating APIs, automating processes & creating Laravel-based admin tools, which interact with their production WordPress-based platform.

Absolute Performance Inc., Remote — *Sr Software Engineer*

September 2015 - March 2016

In 2015, API was contracted by SharpShooter Imaging to take over all aspects of the IT department, including the software development team. They subsequently hired me to assist in the transition of knowledge and to complete development of the custom payroll system I built for SSI.

SharpShooter Imaging, CO / Remote — *Software Developer*

September 2013 - September 2015

Acted as lead developer of new back end administrative tools, including a custom payroll management platform, which provided commission calculations, data analysis & insight into hundreds of photographers' sales for 13 ski venues, and report generation for use with ADP payroll processing. Created a partner portal for use by affiliates to access reporting about photos, sales, commissions, etc. All while supporting and enhancing the legacy code base and tools.

Broadnet, CO — *Senior Software Engineer*

November 2011 - July 2013

Developed and supported patented, proprietary software supporting auto-dialing & mass teleconferencing services, serving millions of calls daily. Acted as senior developer focusing primarily on new development, building administrative tools and interfaces, custom web services, & software/server maintenance scripts. Specialized in back-end tools for administration of call events by call support personnel, management of partner/client records and management / configuration of multiple servers running the application in various customized implementations.
